

I am very assertive that I can represent the faculty of engineering as their director on University of Regina's student Union. Currently in third year of Bachelor of Science in industrial systems engineering. I enjoy volunteering at the university thru the University of Regina Ambassador program and in my spare time I volunteer at the General Hospital as well. Over the year I have seen the University make great improvements in making opportunities for students to grow and now I want to be part of what makes the University of Regina so great and welcoming.
