

My name is Dakota Kaufman, I am in my final semester of my Bachelor of Science Degree with a Major in Computer Science with a Focus in Business. I have already completed a Certificate in Computer Science which was conferred to me in September 2017. I am planning on pursuing a second degree in Business starting this Spring/Summer semester. I have served on the URSU Board of Directors as the Luther Director for the past two years and now wish to step into an Executive role as the VP of Operations & Finance. I feel that I have the experience that will suit this position and all it entails because I already have the experience from serving on the Board of Directors and being the Treasurer for LUSA (Luther College Students Association) for the past six years. In my time as the Treasurer for LUSA I have been through Presidents that were big spenders and others that did not want to spend anything, thus giving me the ability to know how to handle funding and budgets.
