

Myself Yadwinder Singh Deol, I'm interested in the position of 'Director of international students' at the 'University of Regina' because I want to make changes at the campus for the international students. I have seen many issues that the international students are facing since last year I came here. For instance, the primary issue I have seen is the misconduct that they get blamed for. Firstly, as of international students in many countries, there are no given assignments which have to be submitted online. So, it is something new for them and they get easily involved in the misconduct. It happened with me too that is why I want to raise a voice for those students who are not actually involved in the misconduct but they get blamed for it. With the god's grace if I get to this position then I will not let the students get down about those things that I will promise.
