

My name is Saurav Munjapara, a third-year undergraduate student of bachelor's in chemistry at UofR. I was born and raised in Surat, India. Surat is also known as the diamond city of World. I've spent most of my childhood in India before moving to Regina. I came to Regina about 4 years ago for my higher secondary studies. My interests are but not limited to travelling, cooking, experimenting with new hobbies and studying chemistry up to some extent. I would like to submit my candidacy for the VP External Affairs for the upcoming elections. My accumulated knowledge and previous work experience have led me to gain skills such as leadership, teamwork, problem solving and critical thinking. I believe that these skills would be primary catalyst for a candidate participation of such position. In addition to miscellaneous work experiences, I have also been a General Secretary at my High School back in Surat, India. There I have learned about the qualities required to be in such positions. I am looking forward to adding this position as a benchmark in my executive skills and optimize any problems regarding the External Affairs if elected.

Moving on to my targets that I would like to compose with getting elected for this position. To serve my best to the community, I would work on listening to the students and their concerns. I will look for better sponsorship opportunities while working side by side with the marketing team. I will work to find creative alternatives to allow events and new initiatives by the community members and students to be done online in these covid concerning times. I will work towards the betterment of relations of the community and the students.
