

My name is Lenitta Antony and I am a first year Nursing student. I am running for the position of Nursing Director. I have always been a very inquisitive and a passionate person. Right from being a great listener to giving the best and right advise, I feel that I can easily manage and handle my position effectively. I have always felt that I could shape and steer an organization into a right path. As a young individual and a future health care worker, I feel that leadership is important in both professional and personal life. I take this opportunity to give myself a chance to learn from new mistakes and teach my team members and myself to strive forward. I will make myself accountable to every individual and make sure their voice is heard for betterment of URSU. I would make sure that every work assigned and executed will be done with extreme sheer joy and extreme passion. As the name suggests University of Regina Student's Union (URSU) is a safe place for students and I will always make sure it remains to be one of a kind.
